Syllabus: CSCI 630 Software Engineering

Kevin Buffardi

December 2015

Overview

In an advanced study of software engineering, students will refine skills including version control, software testing, and evaluating software quality using modern technologies. Students will collaborate in a distributed software development environment and establish online portfolios by contributing to open source projects and interacting with popular software engineering communities.

Prerequisites: CSCI 430 and classified graduate standing.

Instructor

Kevin Buffardi, kbuffardi@csuchico.edu, Office hours: To be annouced.

Required Materials

Laptop computer; No textbook required
